I would like to access that variable from another module in the same solution/workbook. I have declared it in the first module in the following way: Option Explicit Public MyVar As Integer In the second module, I tried to call it and failed: Set MyVar = Is\_Module1.MyVar The compiler warns: Variable MyVar referenced in procedure or function Is\_Module1 is not declared. I also tried: Set MyVar = Is\_Module1.Module1.MyVar Nothing changes. What am I doing wrong? A: The issue is that, if you declare MyVar as Public, it is scoped to the sheet. If you don't want to introduce another module with the scope, you can use WorksheetFunction.Evaluate which will allow you to calculate it in-place.
