In game, this will allow you to see, and react to, when you are connected to the ball, and when the ball is in motion. Gameplay will feel more natural and 'right' as the data from actual players on the pitch is applied to the player model to make them truly react to the movements of real life. Players will perform real-life movements in situations when a player tackles, dribbles, cuts, shoots, passes and shoots. You will feel more connected to the game and more aware of your surroundings. Real-life tweaks will help provide a more authentic, realistic and fun game experience with this new feature. The frequency of passes between players will be re-calibrated to match real life, as will the accuracy of the passes and the amount of time a player has to create an opening by dribbling. For example, a pass will be made after around two seconds, in the real game, whereas FIFA series games have always had the pass time of two to three seconds. Not only has this feature been designed to add more realism and give you a better game, but also to widen the potential player pool to include players from different footballing nations. Co-Op has been adapted so that not only can you become a defender in the game, but you can also become a midfielder, attacking midfielder, defender or attacker. In this way you can play as your favourite team, but also as any other position. Each team has its own AI, tactical and physical attributes. You can use the "control" button to control both your goalkeeper and your defenders to win the game. With the addition of new stadiums, Commentary and Music, FIFA 22 delivers all the features you need to become the Ultimate Soccer Fan. Key Features: New Commentary from the PES series' lead commentator - David Elleray, the voice of FIFA and PES The legendary music from the world of real football - The FIFA soundtrack New stadiums from clubs around the world - Live in-game audio from FIFA Series' official broadcasting partners New cameras such as the "Stick Camera", a first for FIFA New shooting mechanics New training mechanic, where you can practice precise long passes in true-to-life situations More aggressive tackling Players' faces showing expressions of excitement and tension Hyper-realism of player movements
